PROFESSIONAL SUMMARY

Results-driven Mobile Developer with 5+ years of experience engineering high-performance cross-platform applications across financial services, healthcare, and enterprise sectors. Proven track record at AXA Mandiri architecting secure, transactional mobile solutions for over 50,000+ policyholders and financial advisors. Specialized in Flutter & Dart, enterprise state management (BLoC, Cubit, GetX), Clean Architecture, REST API integration, and real-time communication. Experienced in delivering scalable, crash-resilient codebases with comprehensive automated testing and CI/CD pipelines.

TECHNICAL SKILLS

- **Core Languages:** Dart, Kotlin, Java, PHP
- **Cross-Platform & Frameworks:** Flutter SDK, Android SDK, Material Design, Cupertino
- **State Management:** BLoC / Cubit, GetX, Provider
- **Architecture & Patterns:** Clean Architecture, MVVM, Repository Pattern, SOLID Principles, Modular Architecture
- **Testing & Quality:** Unit Testing (`test`), Widget Testing (`flutter_test`), Integration Testing, Flutter DevTools (Memory & CPU Profiling)
- **APIs & Real-Time Services:** RESTful APIs, WebSocket, Firebase (FCM, Firestore, Crashlytics, Auth), Agora RTC (Audio/Video), OneSignal
- **Local Storage & Database:** SQLite / SQFlite, Hive, Shared Preferences, Secure Storage, MySQL
- **Tools & DevOps:** Git, GitHub Actions, Fastlane, Android Studio, VS Code, Postman, App Store Connect, Google Play Console

---

PROFESSIONAL EXPERIENCE

AXA Mandiri — Jakarta Selatan, Indonesia

Senior Mobile Developer (Flutter) | Nov 2022 – Present

- Architected and maintained enterprise mobile applications handling daily financial transactions and policy lifecycle operations for insurance customers and financial advisors.
- Applied Clean Architecture and modular state management (BLoC/GetX), increasing code reusability by 35% and accelerating release turnaround times.
- Implemented end-to-end security workflows including biometric authentication, dynamic token refresh, and certificate pinning to ensure full compliance with financial industry regulations.
- Optimized network requests and local caching strategies across 30+ REST API endpoints, decreasing data consumption by 20% and improving screen load speeds by 40%.
- Integrated comprehensive performance monitoring and Crashlytics logging, maintaining a 99.8% crash-free user session rate across multiple Android and iOS release cycles.
- Collaborated in Agile/Scrum sprints with backend engineers, UI/UX designers, and QA teams, conducting rigorous peer code reviews and maintaining technical documentation.

PT Ragdalion Revolusi Industri — Cikarang, Indonesia

Mobile Developer (Flutter & Cross-Platform) | Mar 2021 – Sep 2022

- Built and delivered robust mobile applications serving healthcare, co-working, and industrial automation clients from requirements gathering to deployment.
- **Dengerind (Mental Health Platform):** Engineered a multi-modal communication system utilizing Agora RTC for low-latency video consultations, VoIP calls, and real-time chat, supporting thousands of concurrent user sessions.
- **SaicoWork (Smart Co-Working & Meeting Platform):** Developed booking workflows, integrated QR check-in capabilities, and managed push notifications across 13 office locations using Flutter, Firebase, and GetX.
- **OkeDok (Healthcare Platform):** Integrated electronic medical appointment booking and prescription tracking, ensuring responsive UI across diverse screen densities and OS versions.
- Standardized API handling layers with Dio and interceptors, establishing centralized error recovery and automated retry logic.

PT Maestro Manajemen Nusantara — Malang, Indonesia

Mobile Developer | Feb 2020 – Feb 2021

- Developed an automated school attendance tracking application streamlining daily record management for 1,000+ students and teachers.
- Built RESTful APIs using PHP/Lumen and optimized relational database queries (MySQL) to support real-time data sync with the mobile client.
- Executed systematic debugging, unit testing, and memory leak resolution, cutting initial app launch latency by 25%.

SELECTED PROJECTS

- **Dengerind (Mental Health & Teleconsultation):** Built with Flutter, Dart, Agora SDK, Firebase, GetX. Features real-time interactive telehealth video/voice conferencing, secure encrypted chat, and scheduling.
- **SaicoWork (Enterprise Office Management):** Built with Flutter, Firebase, OneSignal, GetX. Features desk/room reservation system, dynamic member billing, and QR-based digital access control.

EDUCATION

Institut Teknologi Nasional Malang
Bachelor of Computer Science, Informatics Engineering | 2016 – 2020
