HIRARKI ARDI PRATAMA

Senior Mobile Developer — Flutter & Android Kotlin

Jakarta Selatan, Indonesia | +62 895-8002-67596 | hirarki.pratama@gmail.com | linkedin.com/in/hirarki-pratama

---

PROFESSIONAL SUMMARY

Versatile Senior Mobile Developer with **5+ years of experience** engineering production-grade mobile applications across both **Flutter (cross-platform)** and **native Android (Kotlin/Java)** ecosystems. Proven track record at **AXA Mandiri** delivering secure, high-volume financial and insurance applications to **50,000+ active users**, while consistently maintaining a 99.8%+ crash-free rate. Deep expertise across the full mobile development lifecycle — from architecture design and feature engineering to testing, CI/CD, and Play Store / App Store deployment. Adept at choosing the right platform (Flutter vs. native Android) based on business requirements, team structure, and performance goals.

TECHNICAL SKILLS

Mobile Development

- **Flutter & Dart:** Flutter SDK, Dart, Material Design, Cupertino, Platform Channels (MethodChannel), Flavors / Build Variants
- **Android Native:** Android SDK, Kotlin, Java, Jetpack Compose, Android Studio

Architecture & Design Patterns

- Clean Architecture, MVVM, MVI, Repository Pattern, Multi-Module Architecture, SOLID Principles

State Management (Flutter)

- BLoC / Cubit, GetX, Provider, Riverpod

Android Jetpack & Core

- Jetpack Compose, ViewModel, LiveData, Kotlin Coroutines, StateFlow / SharedFlow, Navigation Component, Lifecycle, WorkManager

Dependency Injection & Networking

- Hilt, Dagger 2, Koin, Retrofit 2, OkHttp 3, Dio, Moshi / Gson, RESTful APIs, WebSocket

Local Storage & Database

- Room Database, SQFlite / SQLite, Hive, DataStore, EncryptedSharedPreferences, Secure Storage

Testing & Quality

- Unit Testing (JUnit 4/5, `package:test`), Widget Testing (`flutter_test`), UI Testing (Espresso), Mockk / Mockito, LeakCanary, Flutter DevTools, Android Profiler

Cloud, Services & Integrations

- Firebase (FCM, Firestore, Crashlytics, Remote Config, Auth), Agora RTC (Audio/Video/Chat), OneSignal, CameraX / ML Kit (QR & Barcode), Biometric Auth (BiometricPrompt)

DevOps & Build Tools

- Git, GitHub Actions, Fastlane, Codemagic, Gradle (Kotlin DSL), ProGuard / R8, Google Play Console, App Store Connect

Backend & Other

- PHP / Lumen, MySQL, SQL Server, REST API Design, Postman

PROFESSIONAL EXPERIENCE

AXA Mandiri — Jakarta Selatan, Indonesia

Senior Mobile Developer (Flutter & Android) | Nov 2022 – Present

Architected, developed, and maintained enterprise mobile applications serving the full insurance lifecycle — policy management, financial transactions, and agent productivity tools — for **50,000+ policyholders and financial advisors** across Android and iOS platforms.

- Designed and implemented **Clean Architecture** with modular state management (BLoC/Cubit & MVVM), increasing code reusability by **35%** and reducing release cycle time significantly.
- Built enterprise-grade security features: **biometric authentication (BiometricPrompt)**, hardware-backed Keystore session management, dynamic token refresh, and **SSL certificate pinning** to meet strict OJK financial compliance standards.
- Optimized API layer across **30+ REST endpoints** using Dio/OkHttp interceptors and intelligent caching, cutting data consumption by **20%** and improving screen load speed by **40%**.
- Implemented an **offline-first strategy** using Room DB / SQFlite, enabling seamless draft submission for field agents in areas with unstable connectivity.
- Maintained a **99.8% crash-free session rate** across Android and iOS through proactive Firebase Crashlytics integration, ANR monitoring, and memory leak resolution using Android Profiler and Flutter DevTools.
- Collaborated in Agile/Scrum sprints with backend engineers, security teams, QA, and product owners — conducting peer code reviews and maintaining technical documentation.

PT Ragdalion Revolusi Industri — Cikarang, Indonesia

Mobile Developer (Flutter & Android Native) | Mar 2021 – Sep 2022

Built and shipped full-cycle mobile applications across healthcare, smart office, and industrial automation verticals, selecting Flutter or native Android based on each project's requirements.

Dengerind — Mental Health Teleconsultation Platform *(Flutter)*

- Engineered a multi-modal real-time communication system integrating **Agora RTC SDK** for low-latency video consultations, VoIP calls, and encrypted chat, supporting thousands of concurrent sessions.
- Implemented end-to-end appointment scheduling, session monitoring, and push notification delivery via **Firebase Cloud Messaging**.

SaicoWork — Smart Co-Working & Meeting Management *(Flutter)*

- Developed reservation and booking workflows with **QR-based digital check-in** across 13 office locations, integrated real-time seat availability via Firebase, and delivered cross-platform push notifications via **OneSignal**.
- Managed dynamic member billing cycles and role-based access control within the app.

IWWI — Industrial Asset & Maintenance Management *(Android Kotlin)*

- Built a native Kotlin application for real-time machine health tracking, equipment registration via **CameraX QR scanning**, and automated maintenance scheduling using **Jetpack WorkManager**.
- Delivered real-time FCM-powered alert notifications to on-site technicians for urgent equipment downtime events.

OkeDok — Healthcare Appointment Platform *(Flutter)*

- Integrated electronic medical appointment booking, prescription tracking, and responsive UI rendering across diverse screen sizes and Android/iOS versions.

PT Maestro Manajemen Nusantara — Malang, Indonesia

Mobile Developer | Feb 2020 – Feb 2021

- Developed an automated school attendance tracking application serving **1,000+ students and faculty**, featuring GPS-based geofencing and real-time record sync via REST APIs.
- Migrated legacy Java Android modules to modern MVVM architecture, improving UI responsiveness and stability.
- Built and optimized RESTful backend endpoints using **PHP/Lumen and MySQL**, achieving sub-second query response times under concurrent load.
- Implemented systematic unit testing and memory profiling, reducing initial app launch latency by **25%**.

EDUCATION

Institut Teknologi Nasional Malang *Bachelor of Computer Science, Informatics Engineering* | 2016 – 2020

SELECTED PROJECTS

Project	Platform	Tech Stack	Highlights
Dengerind	Flutter (iOS & Android)	Flutter, Dart, Agora RTC, Firebase, BLoC/GetX	Real-time video/voice teleconsultation, encrypted chat, appointment scheduling
SaicoWork	Flutter (iOS & Android)	Flutter, Firebase, OneSignal, GetX	QR check-in, multi-location booking, role-based billing, 13 office locations
IWWI	Android Native	Kotlin, CameraX, WorkManager, FCM, Room DB	QR asset scanning, offline sync, real-time technician alerts
OkeDok	Flutter (iOS & Android)	Flutter, Dart, REST API, Firebase	Medical booking, prescription tracking, multi-device responsive UI
AXA Mandiri Apps	Flutter + Android	Flutter, Kotlin, BLoC, Clean Arch, Crashlytics	Insurance lifecycle management, biometric auth, offline-first architecture
